

Applying Eye Colors to Specific Eye Shapes!

STANDARD EYES

Eyes that are about one eye width apart. Apply **Shade 1** to the brow bone, **Shade 2** on the eyelid, and **Shade 3** at the crease. Remember to blend shades seamlessly while maintaining the definition created by the three shades.

CLOSE SET EYES

Eyes that are less than 1 eye width apart. To help the eyes appear further apart, apply **Shade 1** to the brow bone and **Shade 2** to the eyelid. Apply **Shade 3** to the outer corner of the eye in a softly blended triangle shape. Blend the same shade along the outer third of the

DEEP SET EYES

Eyes set deep w/a prominent brow bone. Apply **Shade 3** to the entire eyelid and on the outer third of the lower lashline. Trace a line from the inner corner of the eye crease to the brow bone with **Shade 2**. Apply **Shade 1** just above **Shade 2** and to the inner corner of the eye.

HOODED EYES

Eyes with an eyelid that is not readily seen. To add dimension to the eyes and give the illusion of a deeper eye crease, apply **Shade 1** to the eyelid. Apply **Shade 3** along the top of the entire length of the eye crease and blend upward almost to the brow. Then apply **Shade 2** along the brow bone instead of the eyelid.

WIDE SET EYES

Eyes that are more than 1 eye width apart. To help eyes appear closer together, apply **Shade 1** to the outer brow bone and **Shade 2** on the eyelid. Apply **Shade 3** to inner corner of the eye instead of the outer corner and extend up to the eye brow. Then apply the same shade to the entire lower lashline.

SINGLE EYES

Eyes without a natural crease. To create the illusion of a larger eyelid, apply **Shade 1** to the eyelid/crease. Apply **Shade 3** in a large sideways 'V' shape, starting from the inner eye corner, just above the eye crease & sweeping back to the outer third of upper lashline. Then sweep same shade along the outer third of lower lashline. Finally, apply **Shade 2** along brow bone.

Choosing Colors Based On Eye & Skin Shades

Note in this equation, hair color and skin undertone is missing. If you need further help with changing hair colors or color choices for your skin undertone etc. ASK me...It's what I do!
